

East Guernsey Local School District
One-to-One Device Protection Plan

East Guernsey Local School District is offering One-to-One Device Protection Plans to students in grades 6-12 who are assigned district owned Chromebooks. Protection plans are optional and cover unintentional damages to the devices. The cost is \$20.00 per student per school year and is non-refundable.

When students are assigned Chromebooks by East Guernsey Local, they and their parents sign an agreement accepting liability for damages. The Protection Plan will cover the costs of replacement or repair **unless** the device is lost, stolen, or intentionally damaged. To participate in the Protection Plan, fill out the form below and submit it to the building secretary or principal. You will receive a receipt and confirmation of Plan participation. Payment may be made by cash, check, or by credit card through the district web site.

The Protection Plan is not in effect until payment has been processed and verified. Returned insufficient funds checks will cause this Plan to be Null and Void. If any replacement repairs have been completed on the device before notice of an NSF check, the Parent will be responsible for the cost of the repair or replacement.
